

COVID-19 tests at ITM

We only perform the COVID-19 test for travelers. Non-travelers who were at risk can consult their GP.

Dit is de omschrijving

ITM offers a COVID-19 test in the following cases:

Pre-travel

- You are about to leave Belgium and have to submit a negative COVID-19 result upon arrival in the country of destination. On our travel medicine website wanda.be you will find the requirements per country. Even if the airline requires a negative test, this can be done with us.

Post-travel

- You have returned to Belgium from a high-risk zone (red or orange zone) and have to be tested. On our travel medicine website wanda.be you will find the requirements after return per country.

Symptoms?

- If you think you have COVID-19 symptoms you should contact your doctor.

For a COVID-19 pre-departure screening (pre-travel) the total fee includes the doctor's consultation and the COVID-19 test. The COVID-19 test has a fixed rate of 46.81 euros.

For a COVID-19 test after a trip (post-travel), when you return from a red or orange zone, you will have to pay for the consultation. The test is reimbursed by the NIHDI.

If we establish during the consultation that you are not eligible for a COVID-19 test, you'll only pay for the consultation.

The attending ITM doctor will inform you of the results by e-mail within 72 hours. If the screening takes place on Friday, the result will be announced on Monday at the earliest.

Make an appointment for a COVID-19 test by sending an e-mail to medsec@itg.be or by calling 03 247 66 66. The appointment takes place between 9am and 4pm.
