

Science Day 2022

Monkeypox, tapeworms and rabies: what do they have in common?

27 Nov 2022 10:00 - 16:00

ITM - Antwerp

Registration not required

Dit is de omschrijving

Monkeypox, tapeworms and rabies are all three zoonoses, infectious diseases that can pass from animals - such as bats, dogs or rats - to humans.

At the **Institute of Tropical Medicine (ITM)**, we study the bacteria, viruses and parasites that transmit disease and the impact they have.

Our team of enthusiastic scientists, doctors, lab technicians is ready to welcome you for an **interactive exploration full of crazy stories, fun experiments and games.**

Come along and discover the fascinating world of zoonoses! For everyone between the ages of 0 and 99.
