ITM Colloquia

Towards the end of each year, the Institute organizes a multiday scientific colloquium about a topic in the field of tropical medicine and international health(care). In recent years the location of the colloquium has alternated between Antwerp and one of our partner institutes, as the list shows. It also indicates in what format the conference proceedings are available. Where possible, a direct link to the site has been provided.

In the past, the conference proceedings were usually published in *Annales de la Société Belge de Médecine Tropicale*, the professional journal of the Belgian Tropical Medicine Association. They can be accessed via [Ann Soc Belg Méd Trop \(1920-1995\)](#). All articles can be downloaded in PDF format free of charge.

Individual contributions from ITM researchers can be accessed via our database at [ITM Staff Publications \(1933- \)](#).
