So what makes studying at ITM so special?

ITM graduates leave very satisfied, have lifelong membership to our ITM alumni network and very often come back.

Flexible programmes

To optimise your career and study needs, mix and match elective modules at ITM and our partner institutes worldwide.

Our experienced professors and their personalised teaching style

They are your study partners – sharing their expertise and acting as catalysts – pushing you to learn through personal participation. ITM professors work in the field, collaborate on research worldwide, and are internationally recognised.

Stress-free tailored student support

You’ll experience student services that help you every step of the way – so that you can concentrate on what’s really important – your study.

We’ll help you make your next professional dream a reality

You can tap into our international, extensive and long-standing network, including 20+ Southern partners. We also work with the WHO, the European Commission, Doctors Without Borders...

Over a century of experience

Established in 1906, we’ve developed from a small training institution to being an international educational, scientific and medical institute working to advance science and health for all worldwide.
