Dit is de omschrijving

The Be-cause health international conference on Urban health on 15-16 October 2019 in Brussels will address the following questions: How to achieve universal access to health in cities? What is the best way to organize health services and the health system in urban settings? How does addressing the impact of urban life impact on the health of urban populations?

[Save the date and check the preliminary programme.](#) Registration will open at the beginning of September.
