

2nd International Conference on Non Tsetse Transmitted Animal Trypanosomosis

OIE NTTAT Network

18-19 dec 2017

Institute of Tropical Medicine - Antwerpen

Reservatie aangeraden

Dit is de omschrijving

The conference will bring together experts from all over the world to exchange recent scientific findings on the different aspects of NTTAT and to receive an update on international regulations and restrictions on animal trade and movement in relation to NTTAT.

The conference will cover all aspects of NTTAT, including parasite biology, pathogenicity, epidemiology, vectors, diagnosis and treatment. The trypanosome species that are covered are *Trypanosoma evansi*, *T. equiperdum* and *T. vivax* as they are pathogenic to animals, in particular domestic species.
