Welcome

BREACH, the Belgium Research on AIDS and HIV Consortium, is the result of a collaborative effort of the Belgian AIDS Reference Centres (ARC) and Laboratories (ARL), scientific research groups and interest organisations in the field of HIV infection and AIDS, aiming to maximise, in all transparency, synergies between its members. BREACH aims to stimulate and facilitate Belgian research of all kinds (clinical trials, epidemiology, public health, basic and translational research, health economics) both at a national and at an international level and to increase its overall visibility. More in particular, BREACH wants to upgrade the quality of the Belgian HIV cohort which should result in an extensive yearly publication of an in depth analysis of the collected data. Furthermore, BREACH wants to collaborate in and to stimulate the development of a coherent approach of the prevention and treatment of HIV infection and AIDS in
